I have worked professionally as a Developer for over 8 years. Experience with large projects keeping open lines of communication between 10-15 developers at a single time within an agile work environment (remote as well as on site). Also including small one person, personal projects as well. Professional experience with multiple code environment's: nodejs, .NET, Ruby, Java and PHP. I would like to continue working on new projects that challenge myself. Interested in partaking in said endeavors with other like minded forward thinking individuals. Please take a look at my GitHub for code examples and personal projects, <https://github.com/scottobrien>.
